PROPELLER SIZES AND INTERCHANGEABILITY

Use this list to determine:

1. Size of propeller when number is known.
2. What new replacement number should be used.

It is suggested that the special Chris-Craft T-36 Series propellers be used when size is available to replace original 7900 Equi-Poise (EP), Tru-Pitch (TP) and T-33 Equi-Poise series.

For information on Transdrive T/D propellers consult page 22.

Super Cup (SC) propellers are used for best high RPM performance.

Recommended replacement is often smaller in diameter or pitch than original due to difference in blade style. Resulting performance should be approximately the same.
